

# HOW to AVOID CRIMES and BEING OFFENDED on the INTERNET

General secondary school

"Matija Mesić"

*Our students report about their journeys!*

## **Poland**

A meeting in Bielsko Biala was held from 23<sup>rd</sup> October to 29<sup>th</sup> October 2010 . During our stay in Poland we have visited Krakow and Auschwitz. We were working on the project but we also had a lot of fun. It was an amazing experience

## **Italy**

A meeting in Cagliari was held from 8<sup>th</sup> April to 15<sup>th</sup> April 2011. It was probably the most relaxing one because its was a very good combination of project activities and visting some of the most famous places in

*"This project has given us a life-worthy experience. We met people around the globe and learned to value other cultures," said one of our students.*

for all of us.

## **Croatia**

A meeting in Slavonski Brod was held from 5<sup>th</sup> February to 11<sup>th</sup> February 2011. During the meeting we chose the best essay on The advantages and disadvantages of Interent, we have also prepared dictionary in four languages. We traveled to Zagreb and Đakovo.

Sardinia (Nuraghi)

## **Romania**

A meeting in Pitesti was held from 22<sup>nd</sup> October to 29<sup>th</sup> October 2011. We met a lot of interesting people. This trip was quite relaxing because we already knew lots of people from trips before.

*Did you know that 7<sup>th</sup> February was the Safer Internet Day?*

•••

This year's Safer Internet Day focused on Net safety for families. The day was celebrated all over the world in different ways. In Croatia there was a variety of activities in Avenue Mall, in Zagreb and in the Peek&Poke, children stores all over Croatia. We also celebrated it in our school. We had various presentations and discussions afterwards.

## Interview with an expert on computer safety

Carnet is a Croatian academic and research network, a computer network on which schools, institutes and colleges are connected. It's headquarters are situated in Zagreb, and supporting centers in other major cities of "Our Beautiful". From Osijek, via videoconference we talked with mr. Branko Bažar, an expert from computer safety department in Zagreb

### **Is Carnet protected? How?**

We are trying to be protected as much as possible on a daily basis. We use the latest methods and a variety of mechanisms by which we control the internet usage or block harmful contents. We use the "little green panel" which filters and denies access to some websites due to viruses, adult content etc.

### **Have you ever caught someone stealing information?**

Of course I have. Those were unauthorized people from the world who were automatically downloading informations and the users of Carnet became the victims.

### **In your opinion, what should be done with the person for whom it is proven that stole information from the internet?**

I believe that these people should be sanctioned in a certain way. In serious cases legislation should be implemented or even police should be called.

### **What is, actually, internet piracy?**

Copyright violation is considered under internet piracy. Piracy is every form of unauthorized using of a copyright work without permission.

### **Is there a piracy law in Croatia?**

Of course there is, like in the most of other countries.

### **What gets stolen most often?**

Lately, information on bank accounts and credit cards are most likely to be stolen!

### **Which are the most common piracy sources? Which software gets pirated the most?**

Regarding software (computer programs), it is games, movies, music and operation systems (usually Windows) that get pirated the most. Depending on the intention, some even make a living

selling it at half price. That kind of piracy is called household piracy.

### **What is copyright?**

Copyright is a work that is protected and may not be copied or distributed any further. It is licensed and only the author can make exceptions.

### **What is EULA?**

EULA is "End User Life Agreement" - a section in which is stated what is allowed to be done with the software [I agree].

### **What is the risk of getting caught in action?**

A lot of effort was put into finding such users lately, but it all depends on what you are doing and whether you're hiding or not. The number of revealed abusers grows daily.

We have conducted a survey about using the Internet in everyday life. Results were shown during our Safety Internet Day manifestation. Our students prepared various graphs among which we chose the most interesting...

## Comenius Day

On the 7<sup>th</sup> of June our school celebrated the Comenius Day. We showed all the clips and presentations that we had made over the first year in Comenius Project.

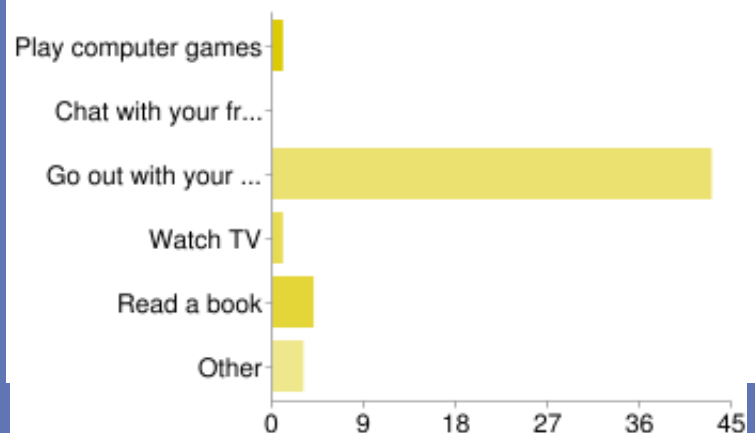

### How much time do you spend on the Internet a day?

### Can you imagine life without the Internet?

### What would you rather do in your free time?

*During various projects organised in our school and all trips to other countries we've made a dictionary of Internet words. It contains useful entries translated from English to all languages of Comenius project partners.*
